

Stack Queue

In this assignment you will develop implementations of a stack and a queue using template.

Thgere are three files that you will use and are provided in the assignment.

- `main.cpp`
- `stack.hpp`
- `queue.hpp`

The `main.cpp` does not require any modifications. The `main.cpp` is the unit test driver.

The `stack.hpp` and `queue.hpp` files provide code stubs and require code develop. These are the areas that require development are marked with `/$$`.
